## EXPERIENCE

**Kalvium**                                                                                                                                    *Bengaluru, India*
**Full Stack Web Developer & Technical Mentor**                                                                   11/2023 – 06/2025
- Engineered an AI-powered assignment evaluator with React, Node.js, and Gemini API, reducing review time by 95%.
- Developed and optimized a scalable LMS using React, Redux, Chakra UI, and RTK Query, boosting efficiency by 15%.
- Designed robust REST APIs using Node.js, Typescript and Express supporting 3,000+ daily users for the LMS platform.
- Mentored and guided more than 50 aspiring full stack web developers through project guidance and code reviews.

**Vanilla Networks**                                                                                                                          *Remote, India*
**Full Stack Web Developer, Contract**                                                                                   11/2022 – 03/2023
- Engineered doctor and patient onboarding flows using React and Tailwind, reducing onboarding time by 25%.
- Created a notification page using React.js and TailwindCSS to enhance user experience.
- Built scalable Node.js APIs with Zod for onboarding and notifications, processing 1,000+ daily requests.

## SKILLS

**Programming Languages:** JavaScript, TypeScript, Java, C++, SQL, Python (Basic)
**Frontend:** React.js, Redux, Next.js, Tailwind CSS, Chakra UI, Shadcn UI, Material UI
**Backend:** Node.js, Express.js, Nest.js, REST API GraphQL (Beginner)
**DevOps/Tools:** Git, GitHub, Docker, Agile Methodology, Railway.app, AWS, Vercel, Turborepo, Monorepo, Postman, VS Code
**Databases:** MongoDB, MySQL, PostgreSQL, Supabase, Redis

## PROJECTS

**Invoice**                                                                                                                               [Github](#) | [Live](#)
- Built Invoice, a modern invoicing platform that generates invoices in under 40 seconds using Next.js.
- Integrated Magic Link authentication, reducing authentication time by 50%.
- Enabled PDF invoice generation and sending email reminders using Nodemailer.
- Enhanced user interactions with alerts and a responsive dashboard designed using Chart.js.
- Added theme switching using next-theme to support a personalized user experience.
- **Tech Stack:** Next.js, React.js, PostgreSQL, Auth.js, jsPDF, Chart.js, Nodemailer, Tailwind CSS, Zod

**Shopsy**                                                                                                                                [Github](#) | [Live](#)
- Developed an e-commerce platform with dedicated customer and admin views for a seamless experience.
- Integrated Stripe to enable secure payments, coupon management, and streamlined the purchase experience.
- Implemented Redis-based caching to significantly reduce load times and improve overall application performance.
- Created admin features to manage products, update order statuses, and promote featured items.
- **Tech Stack:** React.js, Node.js, Express.js, Zustand, Typescript, Tailwind CSS, Stripe, Redis, MongoDB, JWT, Cloudinary

## EDUCATION

Masai School                                                                                                                                  *Bengaluru, India*
**Full Stack Web development**                                                                                                      2022 – 2023

Greater Noida Institute of Technology                                                                                    *Uttar Pradesh, India*
**Bachelor of Technology (Civil Engineering)**                                                                             2018 – 2022
